Wladyslaw Pylypczuk

Junior Frontend Developer

Junior yet ambitious developer with a rich professional background in an international logistics corporation. 2 years ago, I gathered the courage to change my professional path from Logistics to IT, because I have always been passionate about new technologies. To achieve this goal, I completed a 1-year Frontend Certificate Program in Silicon Valley and gained practical experience through an internship and freelance work. Currently, I am actively seeking new career opportunities.

Work History

04/2023 - present

Freelance Frontend Developer

Responsibilities:
- Designing and building websites in accordance with client requirements,
- Registering domains, configuring hosting, and implementing bilingual functionality.

Achievements:
- Positive feedback from client on website aesthetics, functionality, and timely delivery,
- Optimized website contributed to increased visitor engagement.

Applied Technologies:
- HTML, CSS, JavaScript, Bootstrap, Git, Google Fonts/Analytics, Weglot, Netlify.

09/2022 - 03/2023

Web/Software Developer (internship)

Teamcal Ai, Mountain View, California, USA

Responsibilities:
- Working on automatic meeting scheduling Web App,
- Working with existing code, debugging, and implementing new features.

Achievements:
- Independently created an easier process for new users to use the "Timebox" feature.
